

## BIO

Specializing in Abstract and Repurposed subjects, Julio is a multi-dimensional visual artist. His work includes paintings, wearable art and metal sculptures. A highlight of his style is the imaginative use of elements by recycling and reshaping them into new forms, thus giving what otherwise may be considered waste new life through his art.

Originally from Honduras, Julio started painting at the young age of 18, moving to the United States in 1992 and eventually opening his studio in 2010 at the Fat Village Art District in Fort Lauderdale. Throughout the years Julio has worked with various national and international organizations exhibiting his work and taking commissions that highlight his repurposing ability.
